

ISO-9001 Quality Policy

- The company management recognizes that meeting the competitive market conditions requires the provision of reliable and efficient service and assemblies to clients. To this end the company has established and operates a quality management system following the international standard ISO – 9001, version 2015.
- The quality management system is meant to ensure full satisfaction of our clients while keeping quality costs low, maintaining profitability and making sure of the following:
 - Location of assemblies in accordance with clients' demands and requirements.
 - Provision of good, professional service to clients, responding to every inquiry.
 - Increased awareness among company employees and suppliers regarding the importance of quality and reliability
- The company management is committed to taking all possible steps to ensure a continuous process of improving the quality of service provided to its clients.
- The company management is aware that the quality of service depends on the involvement and actions of all company employees and suppliers.
- The company management will see to it that all rules, regulations, and standards relating to its activities are upheld.

Committed to Quality and Excellence in Aviation since 1988
