

Job Title: Procurement Analyst

Location: Givat Shmuel

Job Summary:

The Procurement Analyst will be responsible for collecting, organizing, and analyzing data related to the procurement of aircraft parts. This role focuses on providing insights to optimize inventory levels, track supplier performance, analyze market trends and ensure cost-effective procurement. The analyst will work closely with sales teams to ensure accurate data is available for decision-making, ensuring that procurement processes run smoothly and efficiently.

Key Responsibilities:

- Collect and consolidate data related to aircraft parts procurement, inventory, market trends and supplier performance.
- Create reports and visual dashboards that provide insights into procurement metrics such as lead times, parts availability, and supplier performance.
- Monitor stock levels of critical parts and highlight discrepancies.
- Work with internal teams to ensure data accuracy in the procurement system.
- Track and analyze historical data to support forecasting and procurement planning.
- Develop recommendations for optimizing inventory based on data analysis (e.g., reducing overstock or minimizing stockouts).
- Support sales teams with data-driven insights to Preserve knowledge and awareness of market prices.
- Ensure compliance with industry standards and regulations regarding procurement of aircraft parts.

Skills and Competencies:

- Strong data analysis skills with a focus on large datasets related to inventory.
- Proficiency in data analysis tools such as Excel, Power BI, or procurement software (e.g., SAP, Oracle).
- Detail-oriented with the ability to spot trends, discrepancies, and areas for improvement.
- Excellent communication skills to present data findings and insights to management and sales teams.
- Ability to work independently and efficiently handle large amounts of data.
- Effective Interface Management with Colleagues and Suppliers
- Knowledge of procurement and supply chain processes, particularly within the aviation industry, is an advantage.

Requirements:

- Bachelor's Degree, Preferably in Economics or Exact Sciences.
- Experience in Data Analytics, Supply Chain Management, Aviation, or a related field.
- Strong proficiency with data analysis software and tools.
- Experience in the aviation industry or knowledge of aircraft parts is a plus.
- Excellent organizational and analytical skills with attention to detail.
- High Level of English Proficiency with Strong Speaking and Writing Skills.
